NIVUS - Maintenance Agreements

For reliable Operation of your Systems

Maximum operational reliability

Protection of your investment

Professional maintenance by NIVUS personnel

Documentation and results report after each maintenance

Regular knowledge transfer by NIVUS personnel

Calculable costs

Our Range of Services

With our maintenance contracts, we ensure that your measurement and transmission equipment works permanently. You effectively avoid failures and incorrect measurement data.

Our maintenance services offer maximum operational reliability for your systems and protect your investment. To make sure you never miss a

maintenance appointment, we will contact you automatically when it is due.

You don't need to worry about high costs for travel and working hours when you have on-site maintenance. These are included in the maintenance contract, as is a maintenance report.

NIVUS Service Technicians and NIVUS Original Spare Parts - The best choice for our customers worldwide!

Our Service Technicians

Our service technicians have many years of experience and a wealth of application knowledge. They receive constant theoretical and practical training and are happy to share their know-how with our customers.

Online Maintenance

With our online maintenance, you save on travel costs. Online diagnosis provides the same advantages as on-site maintenance, except for the visual inspection.

The prerequisite for carrying out on-line maintenance is a NivuFlow or NivuFlow Mobile transmitter with a built-in modem. For retrofitting a modem, please contact us.

Original NIVUS Spare Parts

- Selected materials for a long service life
- Highest quality to secure the operation
